I agree – I don't think we have a lot to talk about on just the Nelson Tunnel Site!

My thought on including more than just the Nelson Tunnel was that it might take the spotlight off of the Gold King issue a bit and help to clarify the fact that the other work going on in the watershed is not part of the Superfund project. It might be really confusing there now with Brownfields and Superfund both being "EPA" programs. Also, it give us more to talk about to fill a full meeting agenda.

On the other hand, if we feel that we have enough information to fill an agenda just talking about the Nelson Tunnel then we should just stick with that as the primary meeting topic.

Thanks Joy - I've queried some of our people by email as they're out of the office, and I'll keep everyone posted.

The messaging (NT similarities/differences with GK) would also have to be approved by HQ, right? Just wondering about the possible timing.

Hi Jeannine –

Steve will be back in the office next week so I will plan to talk with him about the potential meeting very early next week. I do think we have a standard messaging about the Gold King Mine, but I suspect people will want to know similarities and differences. Wendy and I would like to have Jeff Graves there from DRMS.

Thanks for thinking through the advertising time line.

I am open to the other programs participating, do you know if they are interested?

I know there was recently a public meeting for brownfields that is required for the brownfield grant that LWCRC/WCRC was awarded, but I don't know if there was State participation at that meeting or not.

After talking with Wendy, I thought it would be a good idea to rough out a schedule of activities that we and Steve Wharton can use in our planning for a meeting on October 7 since we don't know how long it will take to get the go ahead for such a meeting. We understand that EPA will likely need to confer with administration to finalize mine hazard messaging, etc.

What do you think about making this a Willow Creek Watershed meeting? We could have the Voluntary cleanup and Brownfield folks make update presentations and have Nelson Tunnel last on the agenda - leaving ample Q&A for what is likely foremost on people's minds.

To accomplish this, we would have to do the following:

- Week of Sept. 8: Draft agenda Development
- Week of Sept 14: Develop and submit newspaper and Public Service Announcements (PSA) for publication and to start running September 23.

- **This is also the drop dead week for EPA decision to on whether to have the meeting.**
- Week of Sept. 21: Ads will be running. Team meeting to prepare presentations and finalize posters, maps, etc.
- Week of Sept 28: Print materials, etc. Finalize agenda.

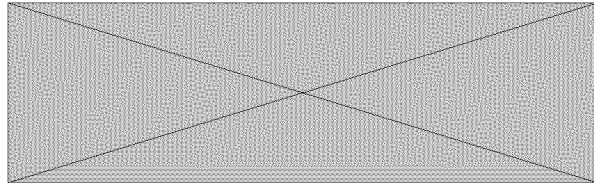

Thoughts?

Hi Cynthia and Jeannine.

WCRC asked that we hold a public meeting in Creede to update folks on what we are doing (progress) at the Superfund site.

We tentatively talked with WCRC about holding this meeting on Wednesday October 7 in the evening. But we have not confirmed this date.

Would you be available and interested in attending?
